RE: Letter of Recommendation – Alex Hubben

To Whom It May Concern:

It is with great pleasure that I write this letter of recommendation for Alex Hubben. Alex was a great help to Sansi North America during his internship in the summer of 2016. He demonstrated confidence and professionalism which allowed our leadership team to feel confident with him interacting with co-workers and clients. His positive attitude and willingness to help were huge contributors to his success at SNA.

Alex rose to the challenge of being on an active job site at 5 AM daily to track the minute to minute tasks of New York City contractors. The project Alex was staffed on was a turnkey, \$5.6 million dollar exterior LED display installation for SL Green, one of Manhattan's largest developers. The reports Alex created were published Online and read by the project team, which included owners, architects, engineers and contractors. This project is now 100% complete and can be found here: [719 7<sup>th</sup> Ave.](#)

Additionally, Alex made an impact in the office when he was not chasing around contractors. He brainstormed product development ideas with key personnel, assisted in network and internet setup, and interacted professionally with subcontractors, co-workers, and clients.

We truly enjoyed working with Alex and would welcome him back at any time.

Sincerely,

Dennis Hickey  
President  
Sansi North America
